SUMMARY

Full-stack developer with experience in both front-end and back-end development. Proficient in various web development technologies. Ready to join a team to create high-quality web applications utilizing my skills and experience.

HARD SKILLS

JavaScript, Next.js, Nest.js, TypeScript, React.js, ReactNative, Tailwind CSS, Node.js, PostgreSQL
MongoDB, MySQL, Firebase

PROFESSIONAL EXPERIENCE

Fullstack developer, BookMe

May 2024 - Present

A site for creating, reading and publishing e-books. The platform supports book uploading and formatting, provides reading tools with annotations and bookmarks, and allows authors to publish and share their works.

Accomplishments:

- Developed an endpoint for obtaining roles.
- Configured processing of form data and sending of requests.
- Layout and integration of the user interface.
- Implemented dynamic routes and data-based page generation.
- Integrated an external API into the application.

Frontend developer, Kharkiv IT Cluster

march 2024 - may 2024

As part of a bootcamp, I contributed to the development of the SafeKid project, which is a child safety app designed to minimize cases of unauthorized movement of children, known as kidnapping.

Accomplishments:

- Development of the user interface.
- Development of the navigation menu.
- Styling project components with Tailwind, achieving consistent and user-friendly design.

PROJECT EXPERIENCE

Food Boutique Team lead, developer.

November 2023 - February 2024

The project is a website for purchasing food products. This application is built on Vanilla JavaScript and uses modern development tools to provide a fast and interactive experience. Implemented filtering, pagination, product card, order basket. [github-link](#)
Build project on github, check for build errors and live page performance.

Stack: JavaScript, HTML, CSS, Github, webpack

PhoneBook backend, Backend developer.**March 2024 - April 2024**

REST API with MongoDB and Express for CRUD operations, JWT authentication, validation with Joi, testing with Jest, image processing with Jim and Multer, sending emails via Nodemailer, CORS and logging with morgan.

Stack: Node.js, Express, MongoDB, JWT, Joi, Jest, Multer, Morgan, CORS, Nodemailer

ToDoshka backend Team lead, developer.**April 2024 - May 2024**

This is a backend for an application similar to Trello. It's designed to manage tasks, projects, and boards, providing functionality similar to the popular collaboration tool Trello. The application includes user authorization, storing data in a database, uploading and storing files, and interacting with external APIs. [app link](#)

Stack: Node.js, Express, Swagger, MongoDB, REST API

AuthMaster backend , Backend developer.**May 2024 - June 2024**

This project utilizes modern web development practices to create a secure and scalable application. JWT authentication, role-based access control, and strong data validation ensure user data security. PostgreSQL with Sequelize manages the database efficiently, and Docker enables consistent deployment.

Stack: PostgreSQL, Nest , Docker , Swagger

Language Leap , Frontend developer.**June 2024 - July 2024**

The project is a website that provides online language lessons. It was created using React, Redux, React Router Dom and Firebase for authentication and data storage. Styling is implemented using Tailwind CSS. Forms are managed and validated using React Hook Form and Yup. The Redux Toolkit provides state management. Additional libraries are used for support functions and build tools.

Stack: React, React Router, Redux, TypeScript, Firebase, [github-link](#)

EDUCATION

Kharkiv National University of Construction and Architecture
Bachelor in “**Building and Civil Engineering**”

September 2017 - June 2020

Go-IT School, Kyiv, Ukraine
Fullstack Developer

May 2023 - May 2024

LANGUAGES

English - intermediate**Ukrainian** - Native**Russian** - Native
