- Russian - Fluent

SUMMARY

Full-stack developer with experience in both front-end and back-end development. Proficient in various web development technologies. Ready to join a team to create high-quality web applications utilizing my skills and experience.

PROJECT EXPERIENCE

Food Boutique link - Application for searching and purchasing food products online. (HTML, CSS/SCSS, JavaScript, Github, webpack) Build project on github, check for build errors and live page perfomance. Role: Team lead, developer.

Language Leap link - website for providing services in language teaching(React, React Router, Redux, TypeScript, Firebase) Role: Developer.

Movie App link - I created an application for searching for trending films or by the name of the film with the ability to view the cast, reviews of the film, rating (React, Redux Toolkit, TMDB API) Role: Developer.

AuthMaster backend - This project utilizes modern web development practices to create a secure and scalable application. JWT authentication, role-based access control, and strong data validation ensure user data security. PostgreSQL with Sequelize manages the database efficiently, and Docker enables consistent)deployment. (PostgreSQL, Nest) Role: Developer.

ToDoshka backend - This is a backend for an application similar to Trello. It's designed to manage tasks, projects, and boards, providing functionality similar to the popular collaboration tool Trello. The application includes user authorization, storing data in a database, uploading and storing files, and interacting with external APIs.(Node.js, Express) Role: Team lead, developer.

PhoneBook backend - REST API with MongoDB and Express for CRUD operations, JWT authentication, validation with Joi, testing with Jest, image processing with Jimp and Multer, sending emails via Nodemailer, CORS and logging with morgan.
